## **WHAT IS IT?**

A business phone solution using Bluetooth technology to enable t-coil equipped hearing instrument wearers hands-free and wireless communication capabilities on their multi-line office phone. The system consists of a Bluetooth phone adapter and a Bluetooth neckloop.

## **HOW DOES IT WORK?**

- Connect business phone to Plantronics phone adapter and plug Deskphone Adapter into AC electrical outlet. Red power light on left front of adapter will illuminate to indicate unit is ON.
- To begin pairing, press and hold both Speaker Volume adjust buttons (+, -) on back of the Plantronics adapter. Hold buttons simultaneously until on-line indicator light on top of adapter flashes blue and power light flashes red. With neckloop OFF, press and hold the Multi-Function Button on the neckloop's left side for more than 3 seconds. The LED indicator will light up solid blue when in pairing mode.
- When pairing, blue light on neckloop flashes rapidly; blue/red lights Plantronics will continue to flash.
- Once paired, blue light on neckloop flashes steadily; blue/red lights on Plantronics will light up solid.
- To turn neckloop ON, press Multi-Function Button, blue light will flash every few seconds.
- Audio from phone is processed by BT adapter & sent wirelessly to BT neckloop.
- Switch hearing aid to "T" or "MT" position when using phone to hear through your hearing aid.

## **IMPORTANT TALKING POINTS:**

- Provides **BOTH Hands-Free & Wireless communication capabilities** for hearing instrument wearers
- Enables t-coil equipped hearing aid wearers to utilize their hearing aid at work
- Plantronics Adapter is compatible with majority of PBX, Multi-Line & VOIP Systems
- Microphone on neckloop enables 2-way communication, eliminating need to speak into handset
