<p>QUEST?AR Communication Practice: Erber, N.</p>	<p>Melbourne: Clavis</p>	<p>A rehabilitation procedure that is easy to use. The client asks conversational questions and attempts to understand the partner's answers. The clinician selects vocabulary and language to match the client's interests and abilities. Both participants apply clarification strategies. Suitable for age seven through adult. Includes booklet, topics, clarification strategies, and</p>	
<p>Communication Therapy for Adults with Sensory Loss by N.P. Erber</p>	<p>Melbourne: Clavis</p>	<p>Revised and expanded, this popular university text and clinical sourcebook describes an innovative approach to the assessment and rehabilitation of adults (and their communication partners) with acquired hearing and vision impairments. Throughout this thought-provoking book you will discover a wide range of conversation-based therapeutic methods that promote self-help, problem solving, and behavioral changes.</p>	
<p>Communication and Adult Hearing Loss by N.P. Erber</p>	<p>Melbourne: Clavis</p>	<p>Recommended for families of new hearing aid users. This practical book is appropriate for anyone who wants to communicate more effectively with a hearing-impaired person, including friends, relatives and health-care providers. It discusses how hearing loss impairs communication and how to resolve or avoid communication difficulties through clear speech and management of situations. Samples of everyday conversation illustrate the</p>	

		methods.
