Preparation for Clinic

Booth (biologic calibration if 1st student)

Equipment check

File Review

All forms ready

Professionalism

Punctuality

Dress

Attitude

Takes initiative

Initial client contact

Introduction

Collection of forms

History

Review of responses

Follow up questions when needed

Review of Concerns

Follow up on red flag items when needed

Otoscopy

Instructions to patient

Use of bracing technique

Ability to visualize TM

Interpretation

Immittance

Explanation of procedure

Patient positioning

Operation of equipment

Obtaining a successful seal

Obtaining accurate reflexes

Marking reflexes on audiogram correctly

Obtaining reflex decay

Explanation of reflexes

Interpretation

Air Conduction Pure Tone Audiometry

Instructions

Positioning of patient

Choice of transducer

Placement of transducer

Threshold procedure

Hz Sequence

Interoctaves

Recognition of need to mask

Masking instructions

Masking procedures

Audiogram recording

Bone Conduction Pure Tone Audiometry

Instructions

Placement of oscillator

Threshold procedure

Hz Sequence

Interoctaves

Recognition of need to mask

Masking instructions

Masking procedures

Audiogram recording

Speech Reception Threshold

Instructions

Ability to calculate PTA

VU Calibration for MLV

Lack of visual cues

Choice of word list

Familiarization procedure

Sufficient # of Spondees Used

Procedure

Recognition of need to mask

Masking procedures

Audiogram recording

Word Recognition

Instructions

VU Calibration for MLV

Lack of visual cues

Use of recorded speech

Presentation Level

Choice of word list

Sufficient # of PB words used

Scoring

Recognition of need to mask

Masking procedures

Audiogram recording
