

WE'VE CRACKED THE CODE TO HIGH PERFORMING, FULLY TRANSPARENT HEARING

High resolution sound processing with precise noise reduction

Feedback free directionality with automatic switching

Objective, reality based fitting

Fully featured, cosmetically appealing Open fittings

Hear Better. Feel Better.
Think speech intelligibility. Think comfort. Forget compromise. With ReSound Metrix™ we've cracked the code on how to help your patients hear better without making them constantly aware of the solution. We call the result "High Performing, Fully Transparent Hearing".

"High Performing" for the fastest, most effective hearing improvement

technologies. And "Fully Transparent" to mean that we've designed each technology to work so subtly, that all your patients will notice is how much better they can hear.

To do it, we've confronted and solved four key challenges within the areas of sound quality, speech clarity, fitting accuracy and open comfort.

Call 800-248-4327 today to find out more about the GN ReSound Metrix.
