

I'm Listening

I was missing out.
Things I couldn't hear.
The alarm. Phone calls
missed. The lost
conversations. Muffled
meetings. It all came
down to a matter of
volume. And now? I am
listening. With
telephones, pocket
talkers and other
amplification products
from Westone.[®] Products
that boost sound — as
well as my morale.

The Westone logo, featuring a stylized 'W' icon followed by the word 'Westone' in a bold, sans-serif font.

Are You Listening?

Hearing loss can quickly
impact your life. Your
relationships with friends
and family. Because
Westone[®] understands these
difficulties, we offer a wide
variety of Assistive Listening
Devices specifically designed
to return you to the life you
enjoy. Traditional and
cordless telephones which
amplify sound and improve
speech understanding.
PockeTalkers[™] that improve
group communications.
Alarm clocks that gently
vibrate the bed to wake you
up. As well as Personal
Sound Amplifiers for
classrooms and meetings.
See your hearing healthcare
professional and ask about
our assistive listening devices.

You'll want to listen.

Westone[®] features a complete line of hearing accessible telephone systems

Your telephone system can be customized to your unique hearing needs. Whether you require a traditional amplified phone, or a hearing-instrument-compatible cordless phone and digital answering system, Westone[®] can match you with the system you need to maximize your hearing potential. Amplify incoming sound from 20 to 43+ decibels. Boost high frequencies to emphasize sounds that improve speech understanding. Or maximize ringer volume at 80 decibels with a flasher to catch your attention. Westone[®] has the solutions at very competitive prices.

Many assistive listening devices can be fitted with Westone[®] custom-fit earpieces. We craft them from impressions of your ears, so you enjoy a perfect, comfortable fit and optimum hearing results. The following products can be fitted with custom earpieces:

Personal sound amplifiers such as the Audioport A200.
Two microphones, located near your ear,
provide a binaural listening environment and a direction-
focused sound field.

PockeTalker[™] II Basic System or the Pro Series.
This personal listener system can be used with television,
one-on-one conversations, small group conversation or, when
properly equipped, to amplify telephones.

Other Assistive Listening Devices

Sonic Boom[™] — Alarms Clocks and Bed Vibrators.

Ringmax[™] — Amplified Telephone Ringers.
