

# I'm Listening

Call me a noise junky.  
I know it's damaging.  
But stay away from it?  
No way. At work—  
jack hammers  
and the big equipment  
rigs. At home — the band  
saw and lawnmower.  
Afterhours? Skeet shoot-  
ing. Dance clubs. NASCAR.  
I am listening — to the  
advice of my hearing  
healthcare professional.  
I wear custom hearing  
protection from Westone.®

Your world is a noisy  
environment. You really can't  
escape. It's everywhere.  
Traffic and construction.  
Sporting events and concerts.  
Chain saws and jet engines.  
Bottomline, exposure to loud  
noise will eventually take its  
toll on your hearing. You can  
take steps to protect your  
precious hearing with  
Westone's® individually  
crafted, custom-fit earplugs.  
Earplugs designed for specific  
noise-reduction applications  
and environments. From  
protecting musicians to  
motorcyclists. Dentists to  
defensive backs. Hunters to  
highway patrolmen.  
The people of Westone®  
design and craft hearing  
protection for your world. See  
your hearing healthcare  
professional and ask about  
hearing protection as  
individual as your ears.  
*You'll want to listen.*

# Are You Listening?

When you work or play in a noisy environment without  
proper hearing protection, it's simply a matter of when —  
not if — you will suffer irreversible hearing loss.  
Just 15 minutes of exposure to 115 decibel noise can cause per-  
manent hearing damage. And it's cumulative — prolonged expo-  
sure to even modest noise can damage your hearing over years.

### The solution: Custom-fit earplugs from Westone®

Each Westone® earplug is created from an impression of your  
ear to provide all-day comfort, fit and noise reduction. Westone  
makes over 15 different styles of earplugs in over a dozen dif-  
ferent materials.

**Westone 4RT.** For motorcyclists. Fits comfortably under  
a motorcycle helmet.

**Westone 39.** A hunter's earplug with Sonic II Valve for  
occasional high impact noise.

**Westone 40 Series.** General purpose solid plugs.  
Good for home and yard uses, as well as studying.

**Westone 42.** A full-thickness filtered sound plug for  
communications applications.

**Westone 47.** The DefendEars™ filtered earplug for noise  
protection and speech comprehension.

**Westone 49.** Musicians and music industry earplugs.

**AquaNot.™** Floatable swimplugs with great noise  
suppression capabilities.

**Westone 70.** Keeps the environment out but still allows for  
communication. Great for surfing!
