ReSound wireless connections

Your patients can connect directly to all ReSound wireless accessories for direct audio streaming and discreet control over their listening experience—without using a neckloop. With a full ecosystem of 2.4 Ghz wireless connectivity, your patients can hear everything better—from family members to the TV—with less effort.

Easily set up by pressing the pairing button on the accessory, open and close the battery doors of the hearing aids, and the accessory is automatically paired with wireless ReSound hearing aids and ready for wireless communication.

- **ReSound Micro Mic**: Significantly improves signal-to-noise ratio in noisy situations, delivers exceptional speech understanding and extends the hearing range up to 80 feet.
- **ReSound Multi Mic**: With the same hearing range of up to 80 feet, doubles as a table microphone, connects with loop and FM systems**, and has a mini-jack input for streaming audio from a computer or mobile device.
- **ReSound Remote Control 2**: Adjust the volume, mute hearing aids, switch programs and see all settings at a glance.
- **ReSound Phone Clip+**: Make crystal clear phone calls, mute background noise while talking, or stream music, podcasts or any other audio from a Bluetooth-enabled phone.
- **ReSound TV Streamer 2**: Stream stereo sound from a TV, computer or music system directly to the hearing aids over a range of up to 20 feet. Includes a Dolby® adaptor for newer televisions.

**FM receiver required.
